From: Matthew Applin
Topic: 2 Message: 2

Welcome everyone!!!

Please feel free to introduce yourselves.

I am 27 and have been into scanners on and off for about 8 years I live in southern NH and have 4 radios a Pro-90 Pro-2040 Pro-2042 and a Pro-2066

Imostly listen to Police,Fire aqnd EMS

I would love to hear about your setups, things you have heard or anything else you think is interesting.

Matt

```
Hi,
I have heard that the police frequency will be changing here in NH
and that scanners will not be able to pick them up......anyone else
heard that?
```

I heard that soon after digital scanners become available that
Nashua PD will become encrypted.

Matt

Hello

Just to let people know I created a New England Area Scanner Chatroom on my web page so please feel free to come and talk about stuff going on in the area. I'm sure that we could have some great discussions about whatever might come up.

Topic: 6 Message: 6

Greetings all, first my apologies for the new guy posting this message as his first one.

I am the owner of a free based notification and breaking news site. We gear towards Fire/Polie/EMS, and inbetween. We just started a few days ago and we're looking for active dispatchers in New England and for people in portions of the mid-Atlantic.

Hopefully we can get a descent turnout and have fun in the process. If you have any questions, please feel free to post and I'll get back to you.

Sgt. Jeff Wiles, NAEMT-I
ENN Co-Director/Overseer of North Regional Dispatchers
NJEN Director

8. New Digital Scanner

Yahoo group: nhradioscanners
Date: 2003-03-05 17:11:45 UTC
From: Greg
Topic: 8 Message: 8

I was wondering if anyone has the new Uniden digital ready scanner and the digital card and if so how well does it work and does it pick up the digital freq used by Nashua, State Police and other agencies in or around NH? Also if you have the BC-250D and BCi-25D where did you get it and the approx price or if you heard of a good place to get the new scanner and at a good price.

9. RE: [nhradioscanners] New Digital Scanner

From: John Mullaney
Topic: 8 Message: 9

Hi Greg,
I was kind of waiting for some one in NH to answer you first till I saw your post in another group and realized no one seemed to be getting around to it.

There are some little bugs but it's a pretty amazing little unit. It does decode the NH State PD and Nashua's trunk no problem. To talk to several local users go to http://www.scanmass.net <http://www.scanmass.net/> . They have them in stock at You Do It Electronics off Rt128 in Needham, MA or at Scanner Master in Needham. In NH the Ham Radio Outlet store has them but I think they may be expensive.

John,

10. Nashua PD frequencies

Yahoo group: nhradioscanners
Date: 2003-03-13 02:42:20 UTC
From: Greg
Topic: 10 Message: 10

I was wondering if anyone has all of Nashua Talkgroups for the citywide trunking radio system, or a web site that would have it, or at least some of the talkgroups. I have most but I am still missing most the fire dept talkgroup. If anyone could help me out I would appreciate it.
I just picked up the new BC250D and I am now picking up Nashua again. It is a great radio and I am having no problems with it at all.

Hello

My name is Gary. I have been using scanners for over 15 years. I just moved to NH. Come to find out having 3 780xlt's Im unable to hear my local Derry PD. Are they digital, I bet Im answeing my own question.

Anyway, Im a member of Metro System, and soon to be rejoining MVPSRN.

Does anyone have any contact with NH Statewide, Im tring to become a member and I seem to not have any luck finding a real contact.

I love taking fire photos and being a fire buff, does anyone here meet/goto fires?

Gary

PS I have a nextel if anyone shares INFO on fires etc...

17. New Hampshire Statewide & Other Buff Groups

Yahoo group: nhradioscanners
Date: 2003-09-13 07:25:56 UTC
From: Gary
Topic: 17 Message: 17

Does anyone have a clue why the email address n1qgs@... and the group address nhsw@yahoogroups.com don't go anywhere.

I moved to NH, and every attempt I have tried, to make verbal connection to this group has goin un heard.

I even emailed the WEB master for NHSW, and he said he would forward my email, well here we are a month later and still no answer.

I have noticed the following items on the following websites.

Here http://www.geocities.com/nhswna/ there is no information on how to join, nor proper working email address.

Here http://www.middlesexradio.com/ again website has missing pages, and no contact info, or how to join.

So here is my question. WHY WHY WHY have a website for your notification/buff group if you cannot seem to keep your INFO current.

At least have some brains and list a working email so people that are new to the area and don't know anyone and want to join have a way to contact the group.

Well thats my rant.

Gary

22. Hi, and Thanks

From: pd_webmaster
Topic: 22 Message: 22

Thanks for letting me in here on your group.
While I am not from the area, I may one day consider moving that direction.

A bit about me real quick. I am the former creator and director of NINN, and founder of a new web site called Police Scan Network. The new web site is why I am here for the most part. I am watching for news, and great information from your group that pertains to Police Scanning. The site will eventually have reviews of online scanners, broadcasts and web sites. In depth, and about those who put them up.

I am looking for volunteers for anyone who might be interested in writing reviews or helping out.

You can check the web site out at http://www.policescan.net

(You will never hear me or see me write another post like this to the group)

Thanks

From: Cruise Promotions
Topic: 25 Message: 25

Here We Grow Again! New Jersey, Washington State and Iowa are already on-board. Florida and Massachusets are pulling their people together. Don't Miss Out!

Come aboard the Funship Carnival Victory, November 7, 2004. Join your fellow firefighters and EMT's for a 7 Day cruise of the Western Caribbean. We are stopping in Cozumel Mexico, Grand Cayman and Ocho Rios before returning to Miami. On top of a great price you will be our guest at an open bar cocktail party while onboard as well as receive $60 per cabin in ship board credit. Don't miss your opportunity to join us! Reduced airfare available from most major cities, just let us know your departure city when you call.

$25 per person initial deposits are due by 12/15/2003. Hope to see you come aboard!

Visit our site for all the details
<http://www.woodstreamtravel.com/firefighter_group.htm>
http://www.woodstreamtravel.com/firefighter_group.htm Inside Cabin Category 4A
<http://www.woodstreamtravel.com/firefighter_6a.htm>

Gary,
A a group owner and moderator myself, I can tell you that it is almost impossible to get rid of it. People join your group, make a request to join, then they get approved, and BANG! The message is there. It happens to me often too. You can not go by a profile anymore. Alot of people want to be private. Chances are someone in the group already deleted the member.

Here is what I have,

155.3250 DHART Helo, Lebanon NH
460.8000 Medflight - somewere in Mass, is used also in NH
155.1600 Lifeflight on Essex County Mass I believe. Always heard them over Amherst Rescue. Not sure if they are still here though.
453.6500 Lifeflight Maine, comes to NH Often. If I remember correctly DHART also uses this at times.

I hope this helps.

53. Medical Helicopters

Yahoo group: nhradioscanners
Date: 2004-08-17 02:03:01 UTC
From: Alan-N1KAK
Topic: 53 Message: 53

Here is the up-date

155.3250 (141.3) DHART Helo, Lebanon NH

460.8000 (114.8) Boston Medflight
130.575 (AM) also Boston Medflight

155.1600 (118.8) UMASS Lifeflight flys out of UMASS Med Center in
Worcester.

453.6500 (103.3) Maine Lifeflight, comes to Northern & Eastern NH.
DHART is also heard on this frequency when going north like to
Lancaster NH. I believe one of the repeaters is located on Mt
Washington, thereby providing great coverage into central NH.
Occasionally I hear them in my car on I-93 in the Manchester area.

155.235 (173.8) Albany MedFlight

155.385 (123.0) - Hartford LifeStar

These helo's also have access to the local FD frequencies when doing a
scene response. Therefore you could also hear them there once thet
shifted to the local FD to communicate with the LZ coordinator.

From: Scott
Topic: 54 Message: 54

Hello all,
I just found this group and I hope someone can help me. I have
a rat shack pro 82 handheld scanner but unfortunatly it is not
capable of 800 mhz which is what Nashua pd operate on. I really miss
having a scanner as I have been listening in Boston since my teens (
a lot of years) is there a way anyone knows of or can actually do for
me that converts this unit to receive 800 ? the top end now is 512.
any advice or other help, particularly someone who can perform this
operation would be greatly apreciated. Thank you in advance.
Scott Turner - Nashua NH

Welcome Scott,
In order to hear Nashua PD, you will need a digital trunk tracking scanner. Radio Shack has one for $500.00, I believe is the cheapest and the APCO-25 card is included. Many departments have gone digital, along with NH State Police, and Sheriffs Depts.

Unfortunately, a conventional scanner just won't do it anymore. The plus side is that you will hear many departments with the Digital Trunk Tracker.

60. New Hampshire communication freedoms / meetings

Yahoo group: nhradioscanners
Date: 2004-09-28 02:27:02 UTC
From: Dada Orwell
Topic: 60 Message: 60

If you're a believer in electronic communication freedoms as I am; this may interest you:

Liberty lovers from around the state (many of them recently escaped from more authoritarian parts of the country) meet in three New Hampshire locations around the end of each month. We discuss ways to get government out of our gun closets and wallets; most of us favor looser regulations on electronic comms devices but could use insight from folks like you who have a better understanding of these issues.

Right now the meetings are in Keene, Manchester and the seacoast area. The folks seem pretty well connected and more often than not there's a state rep present.

For more details on meeting locations and times see:

http://www.freestateproject.org/community/welcomewagon/

We look forward to seeing you there!

61. Looking for Scanner Feeds

Yahoo group: nhradioscanners
Date: 2004-12-31 17:41:50 UTC
From: Scott Halligan
Topic: 61 Message: 61

Hello,

I'm wondering if anyone from ME, NH, and/or VT would be interested in providing a scanner feed into my Scan Massachusetts Teamspeak Server.

Information regarding Teamspeak can be found at my website, http://www.scanmassachusetts.net . Follow the "Teamspeak Feed and Chatroom Info" link on the Scan Massachusetts menu. Teamspeak offers a very unique and effective means of providing scanner feeds in an easy to navigate format. It offers clients easy access to numerous scanner feeds by just the click of a mouse.

In a nutshell, providing a feed would entail running the Teamspeak Client, which is a very low profile program consuming very little of your system resources. It would also require a 9 KBPS stream of audio constantly running from your computer across the internet to the server. This has virtually no effect on a broadband connection. It of course requires a sound card with a line-in jack and a scanner with an external speaker/headphone jack as well.

I would be especially interested in providing MESP, NHSP, VTSP and any other local PD's or FD's as determined by the person providing the feed.

If anyone is interested, kindly e-mail me off list. Thanks very much for reading, and Happy New Year.

Scott

yes salem is digital you need to get the radio shack pro 96 or 2096(both made by gre)

or the uniden Bc 796XLT or Bc 296XLT

i happen to like the Gre stuff from radio shack over the uniden models but thats up to the person buying them there all around $500 give or take a few bucks you can find them on e-bay but not much difference in price after some people charge you high shipping cost

I also think that the GRE/RS digital scanners have the better product for digital. Although, I am disappointed that RS didn't make a bigger display for the mobile. I would consider the 796 in that case.
I also recommend being careful on ebay. Watch the shipping charges.

Jason

66. VERMONT SCANNER / WALKIE TALKIE GROUP

Yahoo group: nhradioscanners
Date: 2005-02-23 13:02:37 UTC
From: John
Topic: 66 Message: 66

We now have a new group on yahoo for those of us in Vermont who are communications buffs. The group is a resource for information on "Police" Scanners, FRS GMRS Walkie Talkies, Shortwave Radio, Marine Two-way Radios, Ham Radio, etc.

Topics of discussion are open to anything of interest about this ever expanding hobby and its history.

If you work in a police department or work / volunteer in a Fire Department or Ambulance Corp. then you are an asset to our group and a special welcome goes out to you!

PLEASE, join us our group at :

From: Jack Pelton
Topic: 67 Message: 71

I assume you are listening to 155.415 MHz. Depending on the town that dispatch is talking to, you might not be able to hear the cruiser because of distance. I know when I am in the seacoast area, I am unable to hear most from the western side of the county. I believe this frequency is not a repeater, so you would not be able to hear both sides if the cruiser is out of your range.

72. 453.400 MHz

Yahoo group: nhradioscanners
Date: 2005-05-28 23:04:01 UTC
From: Jack Pelton
Topic: 72 Message: 72

I heard "Saddleback B" talking to the toll booths on Spaulding Turnpike and the Hampton tolls on I-95. I stumbled across it when I put my Pro-96 into search mode for police/fire. Any other info on this frequency? The only listing I found was in the 2005 Police Call, under NH, State of, listing in Deerfield. Hence, the name "Saddleback B".

Thanks,
Jack

73. Antenna Suggestions

Yahoo group: nhradioscanners
Date: 2005-07-06 02:24:40 UTC
From: Tom Charlton
Topic: 73 Message: 73

Hi everyone! I just joined the group in hopes of gettingsome advice. I currently have a Uniden BCT-8 scanner mounted in my Explorerwith a Radio Shack magnetic mount antenna on the roof. I get decent receptionwith it, but I have one problem: whenever I go into the parking garage at workthe antenna gets knocked down. I'm getting fed up with it. I do notwant to drill into the car at all, so I want advice.

Should I go with a different magnetic antenna, one that hasa spring built in?

Should I go with a through-the-glass mount antenna?

Should I go with a wire-suction cup antenna?

Thanks,

Tom Charlton

Hello Tom,
How about the type of antenna mount that installs in the gap between the hood and fender, opposite side from your AM/FM antenna? Many Ham radio retailers sell this type of mount. Well, I just reread your post. You do not want to drill into the body. The only drilling for this mount would be some mounting screws. Is your Explorer hood aluminum, like it is on my Ranger? If not, try placing the mag mount antenna there, again on the opposite side from your AM/FM antenna. In my experience, the thru glass type didn't work very well for me.

Regards,
Jack

I'll have to agree with the fender mounting unless all you listen to is high band and UHF then go with a Larsen (and only a Larsen) on glass dual band ham antenna. That is the only thing that many hams say works well for on glass.

The suction cup antenna won't work well unless you only listen to stations within a few miles.

How about a big ball mount on the side of your vehicle? =]

Topic: 76 Message: 77

The answer will depend on a lot of things including:

-- others who may be using the same frequency in range of your scanner
-- *where* in NH you are
-- your elevation

But my most simple, direct answer is:

You are almost definately NOT going to hear NLPD from NH.

I don't Think John has any 96 files on there.

Try these ideas:

Subscribe to the NewHampshireScanner yahoo group and try there.
Look for other files for RS scanners. There are conversion files
floating around the internet, but I have not used them.

I would offer mine, but my laptop took a hard crash, and I haven't
worked on it yet.

Does the NH state police use a type of encryption in some of their transmissions? I know they use P-25 digital and able to listen to 85% of the traffic. But sometimes there's an annoying buzzing type sound when the trooper talks and dispatch sounds fine. I use a Radio Shack Pro-96 and listen to Troop A.

Yes. And the P-25 screen notation changes from "LNK" to "ENC" to show when 'encryption' is being used, at least on the Uniden BCD396t unit.

Thanks for the info, Hank. My PRO-96 does not show anything in the display for encryption. Also, I forgot to mention there is another sound I get. It's kind of a warbling sound, It's almost like speech inversion used on analog (Newington, NH PD used it often before P-25).

Hi Jack-
On the BCD396t an encrypted P-25 transmission sounds very similar to the old 'Donald Duck' sound of analog speech inversion. There's plenty of non-encrypted comms however. The encrypted stuff is a major annoyance, no question. Wish there were some way to suppress that awful sound. Maybe in another generation scanner.....?

From: are10@un.unhcr.biz
Topic: 89 Message: 89

This campaign is about Human beings, Democracy, UNHCR, Refugees, The Iraqis, Islam, Kurds, Human rights, Respect, Money, Donations, Angelina Jolie, Pavarotti, Giorgio Armani, Donors, Peace, History, Campaigns and about you if you care about these words.

Hi there,

I am SAM, an Iraqi refugee living in Lebanon at the moment; I have spent the last 10 years of my life as a refugee registered with the UNHCR in Beirut. The last 4 years, I have spent as an activist for peace and human rights (especially refugees and asylum seekers) on the Internet; I'm also books author and ebooks publisher. I have launched many campaigns to improve our situation as refugees in Lebanon and hopefully bring more understanding to our problems worldwide. I helped make many changes and improvements at the UNHCR office in Beirut; I used the Internet as the field for my activities (you can read more about that in my free ebook 'MY CAMPAIGNS'). All my ebooks are free and could be download from my sites.

This is my newest campaign, it's about the illegal and humiliating actions of the UNHCR, who using photos of refugees as banners and human-buttons to collect money. This is an abuse of the dignity and humanity of the refugees and must stop immediately and a clear public apology present by The United Nations High Commissioner for Refugees. My friends, I am talking about the pictures you can see here:
http://lebanon.servetown.com/human-buttons.htm

Also you can read my new campaign 'Urgent, we need smile' here:
http://unhcrlebanon.freewebpages.org/email_me.htm

For more info about UNHCR and life of refugees you can read my free ebooks. I invite you as fellow humans and members of the world community to support my campaign by reading my article on my site and see the human-buttons. The campaign is to support and improve the UNHCR http://www.unhcr.org especially after the last scandals in the UN and UNHCR, just for example: http://www.mizzima.com/archives/news-in-2005/news-in-april/12-April05-22.htm

"We make demonstration and fast because the UNHCR office in Cairo did nothing for our problem..." http://news.bbc.co.uk/2/hi/africa/4440730.stm

Together we will build better world.

You could reach me fast via this form: http://www.psend.com/users/lebanon2/email_me.htm and if you like to know more about me, you can google for my name 'osam altaee'.

Thanks

Not knowing, but it sounds like they are using a mixed mode where the dispatcher is analog, and the mobiles are digital.
If you have a digital scanner, program it correctly. If you do not, you need to purchase one.

92. New Online Scanner covering Northern VT

Yahoo group: nhradioscanners
Date: 2006-04-22 17:27:17 UTC
From: Wallace S. Nolen
Topic: 92 Message: 92

On Teamspeak, there is now an online scanner for Central VT (e.g. Montpelier, Barre, Williamstown, etc.)

I decided to sponsor such scanner online due to the lackof same covering this particular area. Hope you guys enjoy it!

All you have to do is go to this site and follow the urls to log into Team Speak.

http://www.scancapecod.us/xoops/

By the way for anyone in New England, especially in NH, the sysop, Scott is looking for people who have cable/dsl who are willing to set up their computer system to become an online scanner.

It doesn't take much work and little bandwith. In-fact when I set my system up, it took about 1 hour where Scott helped me through every process. Everyone thinks it is sooo complicated, but in reality it is a "piece of cake". By putting scanners online, it helps the hobby and of course if something does break, then anyone can "dial up" the local scanner covering that area and listen to it as if they lived in that area and had their own radio.

I therefore encourage anyone with any kind of DSL/Cable connection and a scanner to email Scott Halligan at: halligan@... and mention to him that I referred you. You don't need a great receiving location. If you enjoy scanning now is your chance. By the way, the system is free for both "broadcasters" and "listeners". Just go to:

http://scancapecod.us/xoops/modules/tinycontent/index.php?id=3

I apologize that I missed you have a 396.

Belknap County uses simplex rather than a repeater, so the dispatchers have a high antenna on a hill, and the mobiles are out of range if you can't hear them.

If that isn't enough help, check the files section here, and see what is available for computer programming. If you don't see anything, sign up for the newhampshirescannner group and check the files there.
Even if you don't have the cable yet, the freq listing will still be helpful.

A list of what you think you can get might be helpful.

If you can only hear noise, you might be hearing a digital signal that
isn't strong enough for the scanner to decode.
Otherwise, make sure the mode is set to FM, and you are not in program
mode when checking a frequency. That is all that is needed to decode a
digital signal.

Hi I live in Rockingham,NH and I have been a scanner nut for 30 years
now I might be ableto help you with any problems thatyou are having
with your scanner, what kind of scanner do you have? is it a digital
scanner? if not you will not get very much from NH there are some that
you can get.
I need to know what frequencys you have in it so I can tell you if
you will receive them or not.

Good to hear from you,wbye30 -

What can you tell me about the differences between Win96 vs ScanCat-Lite? I bought ScanCat, and later had somone say he bought Win96 and it worked very well. The Radio Shack saleman said ScanCat was better. Any comments, suggestions, NH frequency list/files would be greatly appreciated.

I have a new PRO-96 and am looking for frequencies for the State Police and local ones for the Milford area.

I use Win96 and I think it is a nice program. There is a 30 day evaluation period, so you can try before you buy.
I have not used ScanCat or ScanCat lite.

If anyone is looking for a USB to serial adapter, RS sells one that worked nice with Win96 and a Pro-2096. The install directions were incorrect, so try the port driver first, and then the hub driver.

Topic: 111 Message: 111

EUROPEAN AMPLITUDE MODULATION AMATEUR RADIO GROUP

NEW YAHOO GROUP: http://groups.yahoo.com/group/eamarg/

This is a group for licenced amateur radio operators (HAMs) who are interested in the AMPLITUDE MODULATION (AM) mode of communications. The group exists to promote the AM operation in the HAM bands and provide information about operating events and technical matters.

EAMARG encourages regional AM activity insuring there is AM available somewhere on the amateur bands. Based on the fact that the majority of the AM calling frequencies in USA belong outside the european HF bandplans... one of the EAMARG main goals is to help in the establishment of AM calling frequencies that will be compatible with the HF bandplans of the european countries.

EAMARG future plans including the sponsorship of operating events and contests that will promote the use of Amplitude Modulation.

In order to join this group you must be a licenced radio amateur.

Hello there & to answer your question they use as you describe they use what is called maybe a new type of scrambling because if they are on a serious investigation they will use it. I've had a few times where it has happened to me but you can try to knock out any buzzing noice by turning on the ATT as a way to rid of the sound effects. It maybe also as to where you are at a certain location with the pro-96 also try to bring your squelch all the way to the max so I use that to solve this if you are still having a problem after I suggested a few points feel free to let me know when you can, Thank you & enjoy the scanner

113. Re: New PRO-96, Win96 vs ScanCat-Lite

Topic: 102 Message: 113

Gee sounds like you been put in the hot seat. Well I tried both versions and from what I can see is that Win96 is a lot easier to use than scanlite. The way that works is it allows you to use & set the way you want to use it. There is only one way to go is for the Win96 but if you want to use scanlite you may also use both, your choice. Best wishes to you.

Daniel

From: tm69950
Topic: 116 Message: 116

Does anyone know if Radio Shack (GRE) has plans of coming out with any new scanners to compete with the Uniden 396T or 996T? I own a Pro-96 and like it alot but it worries me that Radio Shack is very slow to respond to the changes occuring with rebanding and different types of EDACS Systems coming online, with firmware updates. It makes me wonder if they are just not going to bother. Also I have noticed the price has dropped from $499 to $399 in my local Radio Shack.

Rockingham County uses a simplex system on the two dispatch channels, meaning that there is no repeater. They are on the same frequency, but the base station has much greater power than the mobile units, so you can pick up the dispatcher on the scanner much farther away. I have the same experience in Londonderry.

Kyle

Tom,

Rock Cty only has one repeater. All other channels are simplex. You are to far away to hear most of the portables and mobiles.

I live in Nottingham and with an outside antenna (not very high) I do NOT hear very many mobiles unless they are near.

The mobiles are in Digital. Not mixed mode. The repeater is setup to use mix mode.

Good Luck

Cal in Nottingham

From: Jason Jasper
Topic: 115 Message: 119

I lived in Nottingham, now in Barrington. From my years of experience in this area I know this. Rockingham County uses 1 repeater and all others are simplex.

Having a scantenna 20ft from the top of my 2.5 sty house (in Nottingham) made it for easier listening however, the mobiles were extremely difficult to monitor. I sometimes wondered how they make it back to Rock. Now in Barrington, with the antenna 45 feet up from the ground, I oddly hear almost all on Rock. I believe it has to do with location.

Thank you,

New Hampshire Fire Photography
Jason Jasper

120. 1st Responder News is looking to expand in NH!

Yahoo group: nhradioscanners
Date: 2006-12-27 22:18:23 UTC
From: emsiscott
Topic: 120 Message: 120

1st Responder Wireless News (1RWN), a subsidiary company of 1st Responder News, already very active, and recognized by most media outlets and Public Safety Officials as the "Industry Leader" in most of the East Coast States, is actively looking for News Correspondents to become active as Incident Dispatchers for your area. 1RWN sends breaking news incident alerts to pagers, cell phones, PDAs and e-mails.

1RWN has recently gone live with our new Dispatcher Rewards Program, the most rewarding incentive program in the industry, which will allow our Dispatchers to log into an online store and buy products ranging from cameras to computers to digital scanners to a subscription to our 1st Responder Newspaper to paid membership into one of our 1st Responder Radio Network affiliates (buff groups with 2-way radio coverage and/or photography groups in Long Island, MA, MD, NJ, NYC, PA and VA with more expected soon...), and so much more from over 100+ prizes, by using points earned by being active on our system! EVERY Dispatcher on our system will now reap rewards for their hard work, dedication and loyalty!

We are now active in AL, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IL, IN, KY, LA, MA, MD, ME, MO, MS, NC, NH, NJ, NM, NV, NY, OH, OR, PA, RI, SC, TN, TX, VA, VI, VT, WA, WV and Canada. 1RWN has already acquired many well known Paging Notification Services including TAC-9 Paging, East Coast Paging, Ohio Fire News, Maryland Fire Network, Virginia Fire Net, Toronto Fire Net, Metro Fire Paging and the National Incident News Network (NINN), with several additional under final negotiations. This is a very exciting time to become involved.

1RWN sends instant notifications for any newsworthy Police, Fire, Rescue, Traffic, Weather and Breaking News event within our coverage areas, to pagers, e-mail, cell phones, PDAs and to our online streaming tickers. The vast majority of our Dispatch Staff is comprised of Volunteer and Career Firefighters, Police/Sheriff Officers, Haz-Mat & Rescue Technicians, 911/ALS/Medevac Dispatchers, ALS, BLS & OEM Personnel and Skywarn Spotters, on local, county, state and federal levels.

1RWN has the industry's MOST COMPREHENSIVE Customer Interface selection process which allows our Subscribers to select EXACTLY what information they want to receive, from what areas and to what devices. In other words, you can select to receive JUST building collapse incidents in Yonkers to be sent to your cell phone, with bridge closures in Philadelphia being sent to your pager. You are no longer restricted to receiving ALL alerts from a region, now YOU decide what you receive from the average 16,000 monthly alerts sent

from any of the areas we cover - 37 States, Washington DC, or Canada!

If you are interested, or would like more information, please check
out the website at www.1RWN.com and/or e-mail me at Scott@....

Looking forward to hearing from you,

There is no mod needed. Simply put, you need a digital capable scanner. Such as the PRO-96 / PRO-2096 and the newest from Uniden BCD996

If you do not have a digital capable scanner, you can not get Nashua, which by the way is a motorola trunked system.

Other options are the BC296, BC-396, BC-796, and the aforementioned BC-996. I don't recommend the 396 if you aren't at least an advanced scanner nut. I think the 996 is going to be similar, so stay away from that one too.

I personally recommend the Pro-96. It is very intuitive, and works like most other GRE scanners- meaning if you are already familiar with Radio Shack scanners, the learning curve is even smaller.

It has nothing to do with single, double, or whatever number trunked.
All that matters is if it will handle APCO-25 (digital) and will decode
a motorola system.
Your scanner will follow the trunked system, but will not handle APCO-25.
You can't modify a scanner to add or remove trunking systems.

I hope I can shed some light on monitoring Municipal Freq. in NH.First
of all most use APCO-25 Digital mode.Many small towns are dispatched by
the County Sheriff's Office.Also Fire is Dispatched by Regional Systems.
Interestingly,many small towns will also use frequencies that are
listed as local and may appear to be used for DPW use but in reality
may also be used by the town's PD and FD.So when programming the
Frequencies enter all the Town Government numbers and you may be
surprised at what you will hear.Also,if you can pick up a POLICE CALL
frequency guide it contains a great number of frequencies including
those "local" frequencies mentioned earlier.Scanner Master may also be
a good resource for you. Ed

Coos County has always been considered "Dark Territory" by many of us scanning for 10+years in New Hampshire. Some frequencies are well known, others are not. Barring any recent changes, only Police have wide spread use of P25 Digital in New Hampshire. Outside of possibly some small local usage and the City of Lebanon, Fire and EMS do not use P25 Digital. The North Country has a mix of Regional and Local Fire Dispatch operations. Police Call has been out of print at least in Radio Shack for over a year (maybe a few). Scanner Master I do believe bought the rights and offers the CD for 7.95. However, it doesn't give when that info was obtained. They also don't reference their former NH or Regional Pocket Guides. Radio Reference lists three entries for Coos county. Two are accurate and I can't speak to the third (44.94 for Dog Wardens, this was NHSP Ch-1 Concord Area before they went High-Band).

Here's a list of known frequencies for the area...
-155.5950/P25 - Coos County Sheriff Dispatch (may have analog 136.5 also)
-155.3700/P25 - Berlin Police (may be changing)
-155.5200/P25 - Gorham Police
-154.1300/136.5 - Berlin Fire (Self Dispatch from Desk. Tone from Trucks while Responding)
-155.0850/136.5 - Gorham Fire
-154.4450/136.5 - NorthPac Mutual Aid (Lancaster NHDOT Div-1 Dispatch)
-154.4000/136.5 - Twin State Mutual Aid Dispatch
-155.0550/???.? - Colebrook Area New Mutual Aid Dispatch
-154.3550/136.5 - Pittsburg Fire (may have gone to 155.055)
-171.5250/varies- White Mountain National Forest
-151.2950/P25 - NH Forestry Service Ch-2 North
-151.3775/P25 - NH Forestry Service Fire Towers

There may be more, but I'm not sure. Ambulances may have some separate frequencies as well, depending on community.

As Jason mentioned, the other group recently had inquiries and may shed more light.

> I hope I can shed some light on monitoring Municipal Freq. in

NH.First of all most use APCO-25 Digital mode.Many small towns are dispatched by the County Sheriff's Office.Also Fire is Dispatched by Regional Systems.
Interestingly,many small towns will also use frequencies that are listed as local and may appear to be used for DPW use but in reality may also be used by the town's PD and FD.So when programming the Frequencies enter all the Town Government numbers and you may be surprised at what you will hear.Also,if you can pick up a POLICE CALL frequency guide it contains a great number of frequencies including those "local" frequencies mentioned earlier.Scanner Master may also be a good resource for you. Ed

PL is short for "Private Line", a brand name for Continuous Tone Coded Squelch System, commonly referred to as CTCSS.

I cannot explain it better than done so here:

http://wiki.radioreference.com/index.php/PL
<http://wiki.radioreference.com/index.php/PL>

Please post if you have questions after reading that, and we'll try to answer them.

Jim

I think I've seen it, and I think it is a rather large log-periodic antenna (directional with wide frequency coverage). I passed something similar last month at an FAA facility in Virginia some distance west of DC. Possibly for communicating with aircraft coming over the "pond".

Andy

Hi, Scott.

You want a scanner that can handle "P25" transmissions.

I use a Uniden BCD-396T. Uniden is supposed to be coming out with a
newer model in the next few weeks, though.

The information at RadioReference.com is worth looking at, too.

Topic: 157 Message: 158

Hi,

You still need a radio capable of decoding "P25" ("APCO 25") transmissions.

I use a Uniden BCD-396T, others use a -996T, or a -396XT.

I'm sure other manufacturers make decent radios, also, but that's what I'm aware of.

Good luck, and feel free to ask other questions.

Hello,

Is it "normal behavior"? Some people might say, no, but is *any* hobby "normal"? I say "no". You are in good company, so long as you keep it safe and legal, and you don't interfere with emergency services.

You are what is called a "fire buff".

Another Yahoo! Group you may want to check out is NH-Fire-EMS-Alert. This group isn't a discussion group, but a notification group. People post messages about incidents as they happen.

Also, you may want to be aware of the Statewide New Hampshire Notification Association (http://www.swnh.org/). It is an organization just for fire buffs.

Sites like these concern me. There is a great deal of copied and suspect information. I read on this site that a Manchester Police Officer was recently shot and killed by another Police Officer in Concord. The only Manchester PO I know of being killed was Michael Briggs; and he was shot by a thug, not a PO and not in Concord. Just mentioning something like this is disturbing.

The frequencies currently listed were blatantly copied from the Statewide NH Notification Website and the Scan New England website. Both have information included (as do almost all legit sites and books) that are intentionally incorrect to catch this behavior. And the information was literally copy/pasted without any attempt to convert it. While it may not be illegal to copy from the internet (it is illegal from the books); it is at best, very poor taste.

We don't know who actually created the site and the information regarding who runs it is sketchy at best. Legit sites will almost always include who they are (completely), their associations and such. Even this post wasn't signed.

Finally, there are several FBI patch pics, various odd rules and regulations, etc. One such rule references the "Golden Rule". So with all respect, I would not copy someones hard work, so I ask it not be copied from me or others I have worked with to find and maintain that information

There are currently three accurate and maintained sites on the web that have been a very good reference for scanner ops.
http://www.swnh.org
http://www.scannewengland.net
http://www.radioreference.com
All three have been around for several years and have a large staff of volunteers adding, checking and maintaining the data.

Thank You,
John Marcel

John:

I appreciate the work you and others have done to make great information available online.

While I think you must do what is necessary to protect such hard work from being copied (especially without attribution), I think that sites with copied work and that have numerous spelling and grammatical errors won't last long.

Please keep up the great work!

170. Re: A new NH scanner site

Yahoo group: nhradioscanners
Date: 2009-10-30 15:19:11 UTC
From: halo_vetran
Topic: 167 Message: 170

OK OK OK!!!!!!!!!!!
Let me say this just say how sorry for this mistake. I am NOT perfect but it never did hurt to share my thoughts and frequencies. I wanted to follow the examples of other web site makers and users. If I did anything to offend you then I am very deeply sorry for the blunder. Another factor is that John is right and made some very good strong points. First of all I see that if you copied & pasted it from the book, then I can see a form of illegal issue at hand. Another issue is that the free information act of 1970 states that we have the right to free access of information. I am NOT the kind to judge people's thoughts or opinions on this matter. But it was said that as long as I gave the credits due to those that had submitted the information. I am sick of the past attacks regarding as to if I had violated any copied righted material. NO!! none of you had done this but I had recieved tons of emails regarding the issue. As I said I am deeply sorry for this mistake and I never intended to hurt anybody's feelings. This has me more scared than normal but I can't see as to why the outrages on this. I do my best I can and I get attacked by certain people (NO NAMES MENTIONED BY THE WAY). I always respected John marcell and I give all credits that is due to him for his contribution of information. I do deeply regret that this should of never happened & I could use some massive suggestions of making that site better. Any ideas from you will help me do better and I intend to stay on your good side. Thank you for bringing this to my attention. Have a great weekend. :)

171. Any suggestions to make the site I made better?

Yahoo group: nhradioscanners
Date: 2009-11-01 04:49:12 UTC
From: halo_vetran
Topic: 171 Message: 171

Mr. Bolduc,
I wish to first thank you for your response. Now I am asking if anyone who can throw me some ideas to do better and to not make the same mistakes? I am in the process of changing it around but I need to know what can be done? Thank you for this time.

172. The Scanning Nation

Yahoo group: nhradioscanners

Topic: 172 Message: 172

Hey all. My name is Jim and I live in Pawtucket, Rhode Island. I'm trying to get the word out about my new website dedicated to scanner listeners. I just put up a new page called "IN THE LINE OF DUTY", and it is for all of the law enforcement officers that have lost their lives in the line of duty in 2010. Come join me.

http://thescanningnation.socialparadox.com

Thank you,
Jim

Hello I just purchased a new Radio shack PRO-197. I have a serial cable with it. I'm starting from scratch I have no software Im looking for software and anyone who has a comprehensive list of programmed data for all Police, Fire town departments in the state of New Hampshire along with Utility, business etc frequencies that I could just upload to my scanner? especially would like all scanner frequencies within Merrimack, Hillsboro, Grafton, Sullivan, Strafford Carroll, and Rockingham counties.

Hi, Justin.

Have you been to www.radioreference.com?

They have a huge frequency database, as well as a wiki that discusses available software.

The site is free, but a membership is required if you want to download data directly into your scanner.

Good luck.

175. Weekly FCC grants

Yahoo group: nhradioscanners
Date: 2012-11-13 16:26:42 UTC
From: gmitch86
Topic: 175 Message: 175

Hello, group. I put together a weekly list of new and modified FCC licenses:
<http://gmitch86.home.comcast.net/~gmitch86/quick.htm>
and I am adding this state to the site. If it is OK with the owner and the group I will post a note once a week when the new batch is ready. I usually have it ready on Sunday mornings. If you have any questions, let me know.

223. Weekly grants October 13-19

Yahoo group: nhradioscanners
Date: 2013-10-20 06:41:08 UTC
From: Glenn Mitchell
Topic: 223 Message: 223

It's a light week but it's better than nothing. Although it looks like new land mobile licenses were not granted during the shutdown, there were about 167 new licenses (WQSJ742 to WQSK213) issued on the cutoff week. Also, around 730 non-new land mobile licenses had grants during the shutdown. A lot of this is automated. Most likely a few hundred of those were license modifications. I'm going to look into pulling the "lost" grants from the full database but it may be too much of a pain to do. I'll let you know.

I added the antenna data from the license. It still needs to be cleaned up a little. HTT is height to tip and HAAT is height above average terrain.

On some there is now a link that will take you to the transaction log for modified licenses. This will tell you what was actually modified. I found a couple of links that were wrong but I should get it fixed by next week.

276. New to NH!!

Yahoo group: nhradioscanners
Date: 2014-09-28 21:45:39 UTC
From: wjl82871@...
Topic: 276 Message: 276

Hello!

I am bought a house in Frankin. I have 346xt and a BCT15. Can someone point me in a direction for stuff I am able to scan (non P25). Better yet, maybe a FreeScan file I can build from?

Thank you

Bill (N2ZUL)

Topic: 276 Message: 277

Yes bill go on internet nd bring up scanner frequencies for nh that will help and here are a few to get you started
159.900 main fire dispatch for the lakes Region. they use 154.340 for c-med in the area
Laconia NH went Digital a few years ago you may not be able to get them 155.790
I believe that Gilford is still155.490 and 154.830 is Belnap County sheriff's Dispatch they handle the primary police tor most of the communities in the area such as tilton,Gilmington,New Hampton and many others.
hope this helps you.
Steve

From: John Bolduc
Topic: 276 Message: 280

155.340 is the common ambulance to hospital frequency, not 154.340.

The FILES section of this group has many frequency listing files for the area.

Common digital emission codes are now in bold. Emission codes associated with P25 Phase II now say "(P25 Phase II)". This is only data off of the license, it does not mean that a license will be Phase II next week. There are several sources of emission codes on the web including this one from our friends at Radio Reference:
http://wiki.radioreference.com/index.php/Emission_Designator

Have a good weekend!

314. Laconia Bike Week

Yahoo group: nhradioscanners
Date: 2015-06-03 11:05:52 UTC
From: N1CHU
Topic: 314 Message: 314

The best file found for this event so far is dated 2005. Does anyone have a more current listing or file? Or suggestions as to where I would find/build a customized condensed list? I'd like to combine two of my passions, motorcycles and scanning while attending the event this year. Any new "finds" would be posted to the group, hopefully in the form of a comprehensive event file.

Thanks,

Bill

Thanks Bill, got what I need to start. Others made me aware of some PL/DPL changes, which when checked against RR show correctly. So the BD on RR is current. Now it's a matter of monitoring for verification and some searches for any additional freqs being used that are available (interoperability, etc.). My intent, if I find the time while in Laconia, is to compile a condensed, comprehensive list for the event which I will forward on to the group.

Thanks again,

Bill

Hello, everyone. Comcast is discontinuing personal web pages and all files will be deleted on October 8th. If you want any files from the archives, download them soon:
http://home.comcast.net/~gmitch86/archive/archive.htm

I put up another site here:
http://fccgrants.x10host.com/quick.htm
Since this is a free web hosting site, I will probably only put up a few weeks of past grants. I am also going to put a backup site here:
http://fccgrants.neocities.org/quick.htm

If you have a website with Comcast, you are going to have to figure out what to do with it.

The weekly FCC grants and new applications are ready:
http://home.comcast.net/~gmitch86/quick.htm

Past weeks are here:
http://home.comcast.net/~gmitch86/archive/archive.htm

Or Google "Quick Scanner Links"
